

Joomla!™

...because open source matters

Gerasimos Farmakidis

PHP Developer

gerasimos@webdev.gr

gr.linkedin.com/in/webdevgr

What is Joomla?

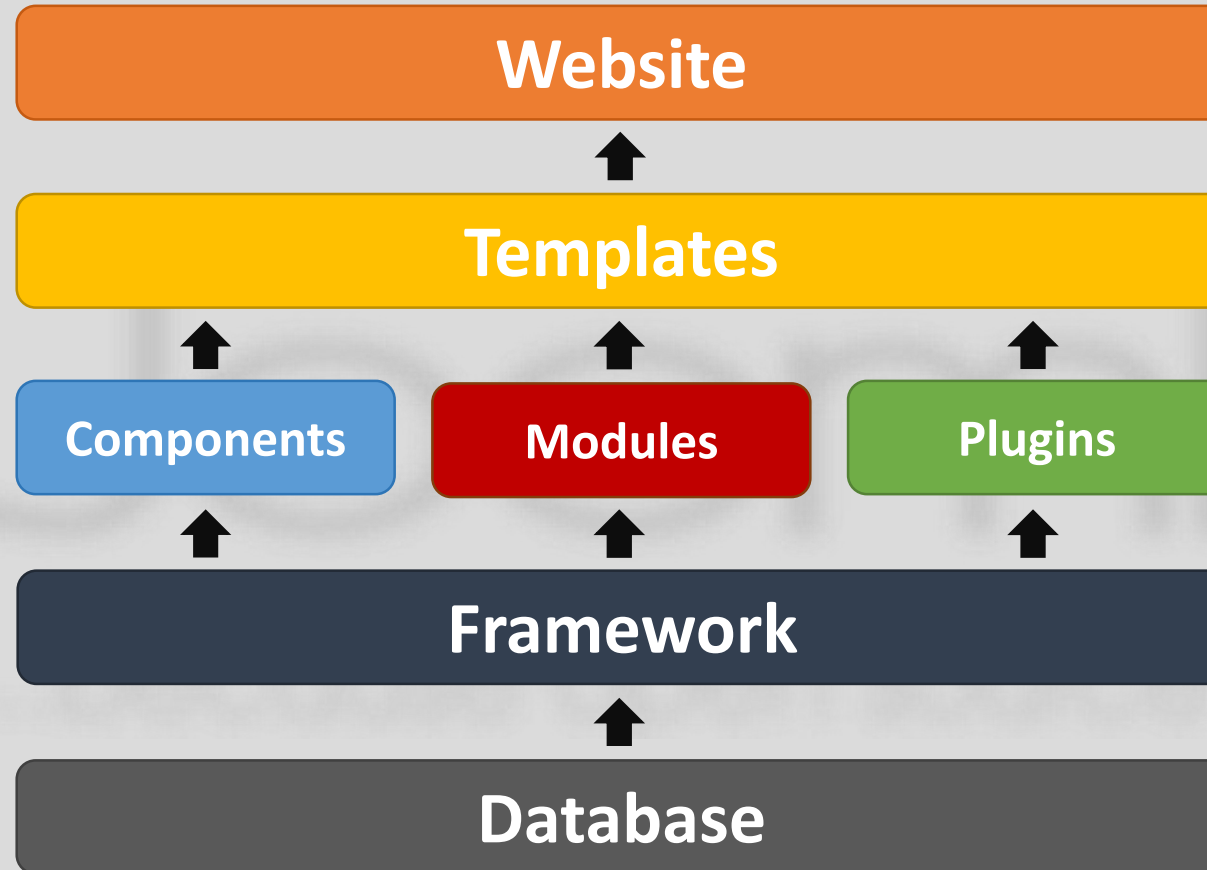

- A fork of Mambo (mambo-foundation.org) in 2005
- The name is a Swahili word (jumla) and meaning "all together "
- Free and open-source content management framework
- Built on a model–view–controller (MVC) web application framework
- Written in PHP, uses object-oriented programming (OOP) techniques
- Stores data in a MySQL, MS SQL or PostgreSQL database
- Last stable release - 3.6.5 (13 December 2016)

Joomla Features

- App based CMS
- Feature-full by default
- Advanced ACL
- Content Versioning
- Native multi-lingual
- Override everything
- Easy Updates
- Native caching

- Content Management
- Template Management
- User Management
- Contact Management
- Banner Management
- Menu Manager
- Media Manager
- Language Manager

Joomla Architecture

Joomla Folder Structure

In this directory you find all files for your Joomla administrator web interface (components, templates, modules, plugins, etc)

This folder holds cached modules, pages and views that do not change frequently.

This folder holds all Joomla components

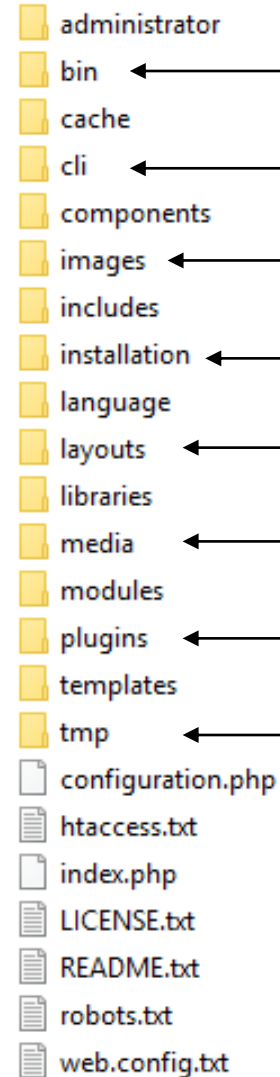

This folder contains bootstrap code that starts Joomla.

In this folder the site application stores the language files for the Joomla CMS and any components or modules that run.

This folder contains all the library classes and code that Joomla uses to run.

This folder hold the module extensions for the site application or frontend.

In this folder contains Templates are another type of extension that can be written for Joomla.

The diagram shows a central list of Joomla folders and files. On the left, seven text boxes describe the folders administrator, cache, components, includes, language, libraries, and modules. On the right, seven text boxes describe the folders bin, cli, images, installation, layouts, media, and tmp. The central list includes: administrator, bin, cache, cli, components, images, includes, installation, language, layouts, libraries, media, modules, plugins, templates, tmp, configuration.php, htaccess.txt, index.php, LICENSE.txt, README.txt, robots.txt, and web.config.txt. Arrows point from the descriptions to their respective folders.

- administrator
- bin
- cache
- cli
- components
- images
- includes
- installation
- language
- layouts
- libraries
- media
- modules
- plugins
- templates
- tmp
- configuration.php
- htaccess.txt
- index.php
- LICENSE.txt
- README.txt
- robots.txt
- web.config.txt

This folder holds the keychain class and is used when there is a need to load or store data to an encrypted data source.

This folder holds scripts that would not be run from the web browser. (cron jobs)

This folder by default holds content images

This folder and the contents under it hold the installation application.

Joomla allows you to override layouts. In this folder contains common layouts.

This folder holds assets related to extensions and the Joomla system.

This folder hold the plugin extensions for the site application or frontend.

The tmp folder hold files and data that are in temporary use.

Joomla Pros and Cons

Pros

- Full Fledged CMS
- Small Learning Curve
- Easy To Manage
- Multi-Lingual Support
- Community Support

Cons

- Migration – 1.5 → 2.5 - 3.5
- Security – Open Code
- Blurry roadmap
- Too focused on framework
- Community leadership issues

Joomla Community

- joomla.com
- joomla.org
- forum.joomla.org
- extensions.joomla.org
- docs.joomla.org
- developer.joomla.org
- api.joomla.org
- joomla.gr
- forum.joomla.gr

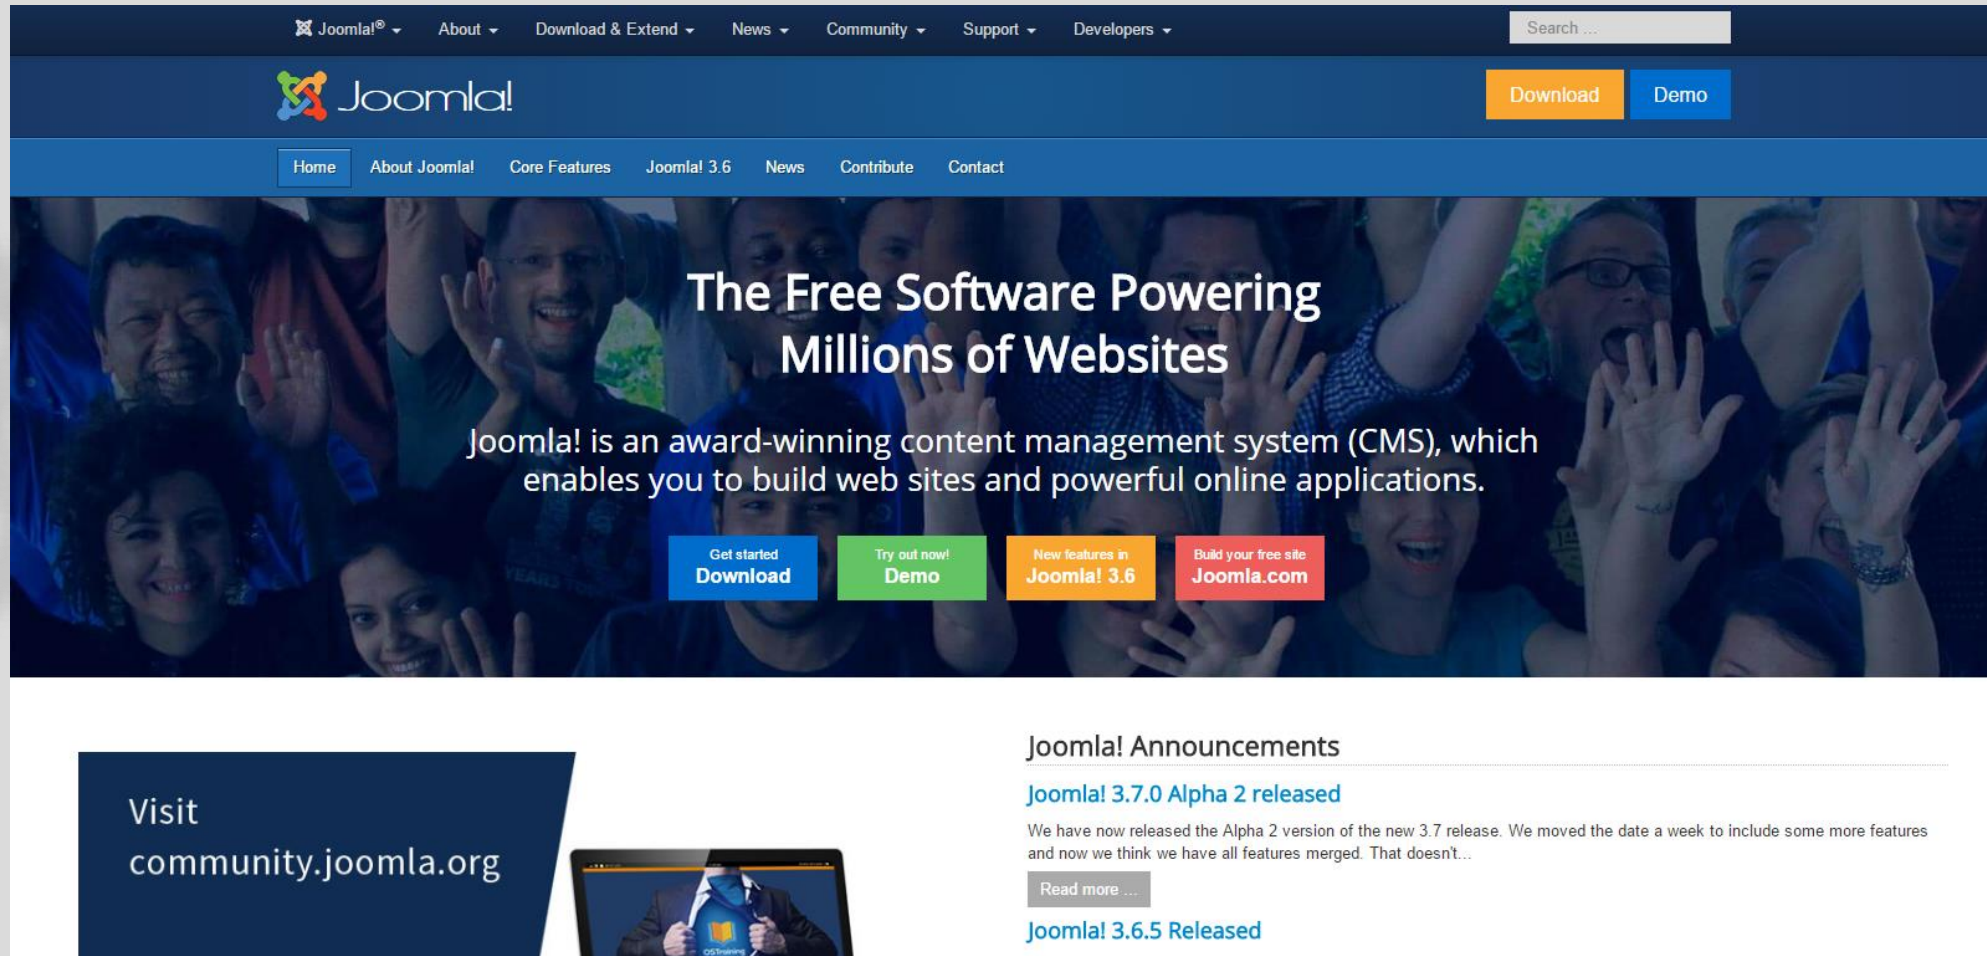

Greek Joomla Sites

- Υπουργείο Παιδείας, Έρευνας και Θρησκευμάτων - minedu.gov.gr
- Υπουργείο Αγροτικής Ανάπτυξης και Τροφίμων - minagric.gr
- Περιφέρεια Κρήτης - crete.gov.gr
- Cosmote Books - cosmotebooks.gr
- Roma Pizza - romapizza.gr
- Newsbomb - newsbomb.gr

- Carrefour - carrefour.com
- Holiday Inn Express Bath - expressbath.co.uk
- National Crime Agency - nationalcrimeagency.gov.uk
- United Nations Regional Information Centre - unric.org
- Michael Phelps - michaelphelps.com

Where to start

The screenshot shows the Joomla! website homepage. At the top, there is a dark blue navigation bar with links for Joomla!®, About, Download & Extend, News, Community, Support, and Developers. A search bar is located on the right. Below this is a blue header with the Joomla! logo and buttons for Download and Demo. A secondary blue bar contains links for Home, About Joomla!, Core Features, Joomla! 3.6, News, Contribute, and Contact. The main content area features a large image of a diverse group of people with their hands raised, overlaid with the text: "The Free Software Powering Millions of Websites". Below this, a paragraph states: "Joomla! is an award-winning content management system (CMS), which enables you to build web sites and powerful online applications." Four colored buttons are present: "Get started Download" (blue), "Try out now! Demo" (green), "New features in Joomla! 3.6" (orange), and "Build your free site Joomla.com" (red). The bottom section is white and contains a dark blue box on the left with the text "Visit community.joomla.org" and a small image of a person on a laptop. On the right, under the heading "Joomla! Announcements", there are two news items: "Joomla! 3.7.0 Alpha 2 released" and "Joomla! 3.6.5 Released", each with a brief description and a "Read more ..." link.

★★★★☆ Version : 3.6.5, 2.5.28  Release Date : 13-12-2016

[Install](#) [Overview](#) [Features](#) [Screenshots](#) [Demo](#) [Ratings](#) [Reviews](#) [Import](#)

Joomla is an award-winning content management system (CMS), which enables you to build Web sites and powerful online applications. Many aspects, including its ease-of-use and extensibility, have made Joomla the most popular Web site software available. Best of all, Joomla is an open source solution that is freely available to everyone.

Joomla is free, open, and available to anyone under the [GNU/GPL license](#).

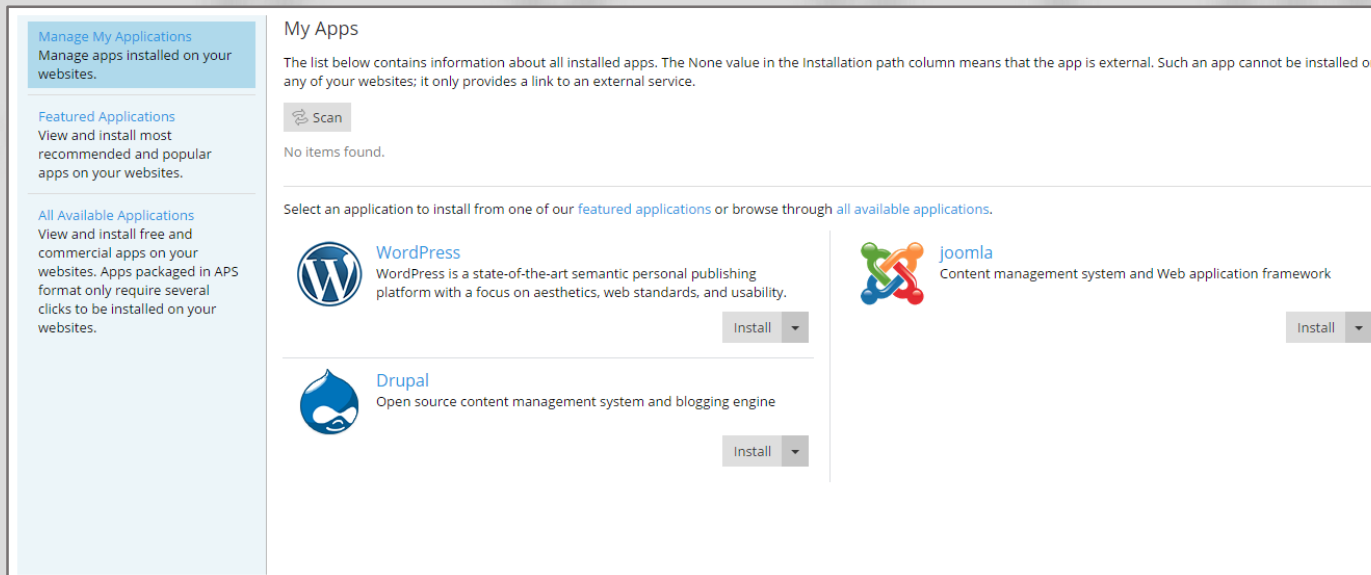

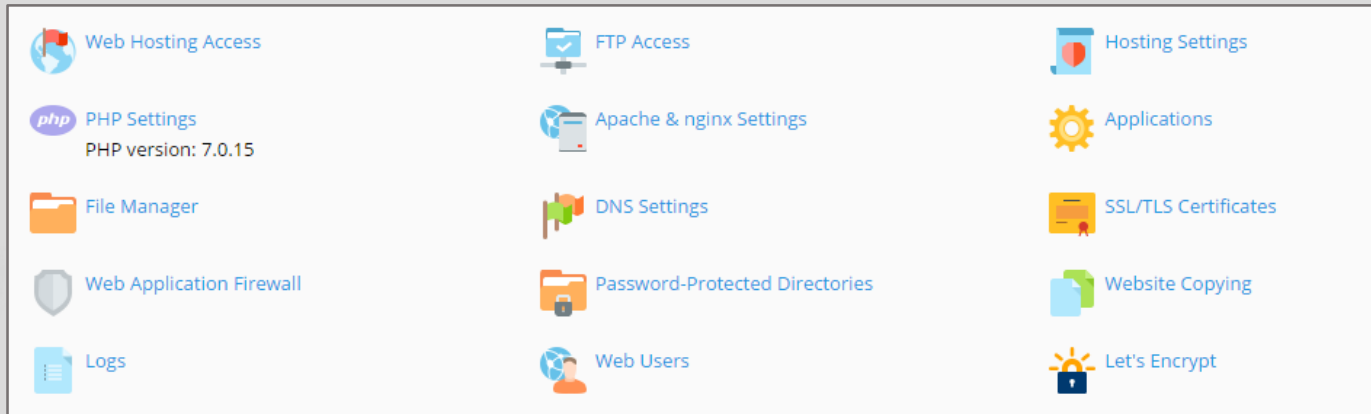

[Install Now](#) [My Apps](#)

 **Space Required**
Available Space : Unlimited MB
Required Space : 30.96 MB

 **Software Support**
[Visit Support Site](#)
Note: Softaculous does not provide support for any software.

Where to start

Plesk

How to use

Joomla!® is free software released under the [GNU General Public License](#).

1 Configuration

2 Database

3 Overview

Select Language English (United States) → Next

Main Configuration

Site Name *

Enter the name of your Joomla! site.

Description

Enter a description of the overall website that is to be used by search engines. Generally, a maximum of 20 words is optimal.

Administrator Email *

Enter an email address. This will be the email address of the website Super User.

Administrator Username *

Set the username for your Super User account.

Administrator Password *

Set the password for your Super User account and confirm it in the field below.

Confirm Administrator Password *

Site Offline

Yes

No

Set the site Frontend offline when installation is completed. The site can be set online later on through the Global Configuration.

→ Next

How to use

Joomla!® is free software released under the [GNU General Public License](#).

1 Configuration

2 Database

3 Overview

Database Configuration

← Previous

→ Next

Database Type *

MySQL

This is probably "MySQL".

Host Name *

localhost

This is usually "localhost" or a name provided by your host.

Username *

root

Either a username you created or a username provided by your host.

Password

For site security using a password for the database account is mandatory.

Database Name *

joomla

Some hosts allow only a certain DB name per site. Use table prefix in this case for distinct Joomla! sites.

Table Prefix *

jnre8_

Create a table prefix or use the randomly generated one. **Ideally four or five characters long, it may only contain alphanumeric characters and MUST end in an underscore. Make sure that the prefix chosen is not already used by other tables.**

Old Database Process *

Backup

Remove

"Backup" or "Remove" any existing tables from former Joomla! installations with the same "Table Prefix".

← Previous

→ Next

How to use

Joomla!® is free software released under the GNU General Public License.

1 Configuration

2 Database

3 Overview

← Previous

→ Install

Finalization

Install Sample Data

- ☐ None (Required for basic native multilingual site creation)
- ☐ Blog English (GB) Sample Data
- ☒ Brochure English (GB) Sample Data
- ☐ Default English (GB) Sample Data
- ☐ Learn Joomla! English (GB) Sample Data

Installing sample data is strongly recommended for beginners.
This will install sample content that is included in the Joomla! installation package.

Overview

Email Configuration

Yes

No

Send configuration settings to `admin@joomla.dev` by email after installation.

Main Configuration

Site Name	Joomla! Site
Site Offline	No
Administrator Email	admin@joomla.dev
Administrator Username	admin
Administrator Password	***

Database Configuration

Database Type	mysql
Host Name	localhost
Username	root
Password	
Database Name	joomla
Table Prefix	jnre8_
Old Database Process	Backup

Pre-Installation Check

If any of these items are not supported (marked as **No**) then please take actions to correct them.
You can't install Joomla! until your setup meets the requirements below.

PHP Version >= 5.3.10	Yes
Magic Quotes GPC Off	Yes
Register Globals Off	Yes
Zip Compression Support	Yes
XML Support	Yes
Database Support: (mysql, pdo, pdo_mysql, sqlazure, sqlsrv)	Yes
MB Language is Default	Yes
MB String Overload Off	Yes
INI Parser Support	Yes
JSON Support	Yes
Mcrypt Support	Yes
configuration.php Writeable	Yes

Recommended settings:

These settings are recommended for PHP in order to ensure full compatibility with Joomla!.
However, Joomla! will still operate if your settings do not quite match the recommended configuration.

Directive	Recommended	Actual
Safe Mode	Off	Off
Display Errors	Off	On
File Uploads	On	On
Magic Quotes Runtime	Off	Off
Output Buffering	Off	On
Session Auto Start	Off	Off
Native ZIP support	On	On

← Previous

→ Install

How to use

Joomla!® is free software released under the [GNU General Public License](#).

Congratulations! Joomla! is now installed.

Joomla! in your own language and/or automatic basic native multilingual site creation

Before removing the installation folder you can install extra languages. If you want to add extra languages to your Joomla! application select the following button.

[→ Extra steps: Install languages](#)

Note: you will need internet access for Joomla! to download and install the new languages.
Some server configurations won't allow Joomla! to install the languages. If this is your case, don't worry, you will be able to install them later using the Joomla! Administrator.

PLEASE REMEMBER TO COMPLETELY REMOVE THE INSTALLATION FOLDER.

You will not be able to proceed beyond this point until the installation folder has been removed. This is a security feature of Joomla!

Joomla! is all about allowing you to create a site that matches your vision. The possibilities are limitless; this sample site will get you started.

There are a few things you should know to get you started.

Every Joomla! website has two parts: the Site (which is what your site visitors see) and the Administrator (which is where you will do a lot of the site management). You need to log in to the Administrator separately with the same username and password. There is a link to the administrator on the top menu that you will see when you log in.

You can edit articles in the Site by clicking on the edit icon. You can create a new article by clicking on the Create Article link in the top menu.

To do basic changes to the appearance your site click Home, Site Settings and Home, Template Settings.

To do more advanced things, like edit the contact form, manage users, or install a new template or extension, login to the Administrator.

Side Module

This is a module where you might want to add some more information or an image, a link to your social media presence, or whatever makes sense for your site.

You can edit this module in the module manager. Look for the Side Module.

Joomla! is all about allowing you to create a site that matches your vision. The possibilities are limitless; this sample site will get you started.

There are a few things you should know to get you started.

Every Joomla! website has two parts: the Site (which is what your site visitors see) and the Administrator (which is where you will do a lot of the site management). You need to log in to the Administrator separately with the same username and password. There is a link to the administrator on the top menu that you will see when you log in.

You can edit articles in the Site by clicking on the edit icon. You can create a new article by clicking on the Create Article link in the top menu.

To do basic changes to the appearance your site click Home, Site Settings and Home, Template Settings.

To do more advanced things, like edit the contact form, manage users, or install a new template or extension, login to the Administrator.

Some quick tips for working in the Administrator

- To change the image on all the pages: Go to the Module Manager and click on Image Module.
- To edit the Side Module: Go to Extensions, Module Manager and click on Side Module.
- To edit the Contact Form: Go to Components, Contacts. Click on Your Name.

Once you have your basic site you may want to install your own template (that controls the overall design of your site) and then, perhaps additional extensions.

There is a lot of help available for Joomla!. You can visit the [Joomla! forums](#) and the [Joomla! documentation site](#) to get started.

You can edit this module in the module manager. Look for the Side Module.

Login Form

Hi Super User,

Log out

How to use

<http://my-joomla-site.dev/administrator>

The image shows the Joomla! administrator login interface. At the top is the Joomla! logo, which consists of a colorful icon of four interlocking rings followed by the text "Joomla!". Below the logo are two input fields: "Username" and "Password". Each field has a small icon to its right (a person for username, a lock for password) and a question mark icon. Below these fields is a blue "Log in" button with a white lock icon.

extensions.joomla.org/extension/adminexile/

How to use

The screenshot displays the Joomla! Control Panel interface. At the top, there is a navigation bar with menu items: System, Users, Menus, Content, Components, Extensions, and Help. The Joomla! logo and 'Joomla Site' link are on the right. Below the navigation bar is a 'Control Panel' header with the Joomla! logo. The main content area is divided into several sections:

- CONTENT**: Includes links for New Article, Articles, Categories, and Media.
- STRUCTURE**: Includes links for Menu(s) and Modules.
- USERS**: Includes a link for Users.
- CONFIGURATION**: Includes links for Global, Templates, and Language(s).
- EXTENSIONS**: Includes a link for Install Extensions.
- MAINTENANCE**: Includes status messages: 'Joomla is up to date.' and 'All extensions are up to date.'

Key features and data shown:

- You have post-installation messages**: A light blue box with a 'Read Messages' button. Text: 'There are important post-installation messages that require your attention. This information area won't appear when you have hidden all the messages.'
- RECENTLY ADDED ARTICLES**: A table listing three articles:

Checkmark	Article Title	User	Date
✓	About Us	Super User	2011-01-01 00:00
✓	Article 1 Title	Super User	2011-01-01 00:00
✓	Creating Your Site	Super User	2011-01-01 00:00
- POPULAR ARTICLES**: A table listing three popular articles:

Count	Article Title	Date
163	Creating Your Site	2011-01-01 00:00
7	About Us	2011-01-01 00:00
0	Article 1 Title	2011-01-01 00:00
- LOGGED-IN USERS**: A table listing one logged-in user:

User	Date
Super User Administration	2017-02-07 19:37

The footer shows: View Site | 0 Visitors | 1 Administrator | 0 Messages | Log out. Joomla! 3.6.5 — © 2017 Joomla Site.

How to use

The screenshot displays the Joomla! administrator interface. The top navigation bar includes the Joomla! logo, a user profile icon, and a 'Joomla Site' link. Below this is a secondary navigation bar with a 'System' dropdown menu. The 'System' menu is open, showing options: 'Control Panel', 'Global Configuration' (highlighted), 'Global Check-in', 'Clear Cache', 'Clear Expired Cache', and 'System Information'. The main content area is titled 'Global Configuration' and features tabs for 'Site', 'System', 'Server', 'Permissions', and 'Text Filters'. The 'Site' tab is active, showing 'Site Settings' and 'SEO Settings'. The 'Site Settings' section includes fields for 'Site Name *' (Joomla Site), 'Site Offline' (Yes/No buttons), 'Mouse-over Edit Icons for' (Modules), 'Default Editor' (Editor - TinyMCE), 'Default Captcha' (- None Selected -), 'Default Access Level' (Public), 'Default List Limit' (20), 'Default Feed Limit' (10), and 'Feed Email Address' (No Email). The 'SEO Settings' section includes 'Search Engine Friendly URLs' (Yes/No buttons), 'Use URL Rewriting' (Yes/No buttons), 'Adds Suffix to URL' (Yes/No buttons), 'Unicode Aliases' (Yes/No buttons), and 'Include Site Name in Page Titles' (No). Below these is the 'Cookie Settings' section with 'Cookie Domain' and 'Cookie Path' input fields. The bottom status bar shows 'View Site', '1 Visitor', '1 Administrator', '0 Messages', and a 'Log out' button. The footer text reads 'Joomla! 3.6.5 — © 2017 Joomla Site'.

How to use

The screenshot shows the Joomla! Global Configuration interface, specifically the 'Permissions' tab. The left sidebar lists various system components, and the main area displays the 'Permission Settings' for the 'Public' user group. The settings are organized into a table with columns for Action, Select New Setting, and Calculated Setting. The 'Public' user group is selected, and the settings are currently set to 'Not Allowed (Default)' for all actions.

Site System Server Permissions Text Filters

Text Filter Settings

These text filter settings will be applied to all text editor fields in the selected groups. These filtering options give more control over the HTML your content providers submit. You can be as strict or as liberal as you require to suit your site's needs. The filtering is opt-in and the default settings provide good protection against markup commonly associated with website attacks.

Filter Groups	Filter Type ¹	Filter Tags ²	Filter Attributes ³
Public	No HTML

How to use

The screenshot displays the Joomla! 3.6.5 administration interface, specifically the 'Users' management section. The top navigation bar includes 'System', 'Users', 'Menus', 'Content', 'Components', 'Extensions', and 'Help'. The 'Users' menu is expanded, showing options: 'Manage', 'Groups', 'Access Levels', 'User Notes', 'User Note Categories', and 'Mass Mail Users'. The left sidebar lists 'Users', 'User Groups', 'Viewing Access Levels', 'User Notes', and 'User Note Categories'. The main content area features a toolbar with 'New', 'Block', 'Unblock', 'Delete', and 'Batch' buttons. Below the toolbar is a search bar and a table of users. The table has columns for Name, Username, Enabled, Activated, User Groups, Email, Last Visit Date, Registration Date, and ID. One user, 'Super User' (admin), is listed with status 'Enabled' and 'Activated'. The footer shows site statistics: 0 Visitors, 1 Administrator, 0 Messages, and a 'Log out' button. The Joomla! logo and version (3.6.5) are also visible.

Name	Username	Enabled	Activated	User Groups	Email	Last Visit Date	Registration Date	ID
Super User	admin	✓	✓	Super Users	admin@joomla.dev	2017-02-08 18:51:27	2017-02-07 21:28:43	647

How to use

The screenshot displays the Joomla! administrator interface. The top navigation bar includes menus for System, Users, Menus, Content, Components, Extensions, and Help. The 'Content' menu is open, showing options for Articles, Categories, Featured Articles, and Media. The 'Articles' menu item is selected, leading to the 'Articles' management page. This page features a sidebar with 'Articles', 'Categories', and 'Featured Articles' links. The main content area shows a list of articles with columns for Status, Title, Access, Author, Language, Date, Hits, and ID. The 'Status' column includes checkboxes for publishing and starring. The 'Title' column shows the article title and its alias. The 'Access' column shows the access level (Public). The 'Author' column shows the user name and alias. The 'Language' column shows the language (All). The 'Date' column shows the creation date (2011-01-01). The 'Hits' column shows the number of hits (175, 0, 10). The 'ID' column shows the article ID (6, 3, 2). The 'Creating Your Site' article is uncategorized, while 'Article 1 Title' and 'About Us' are categorized under 'News' and 'Uncategorised' respectively. The bottom status bar shows 'View Site', '0 Visitors', '1 Administrator', '0 Messages', and a 'Log out' link. The Joomla! logo and version (3.6.5) are visible in the top right corner.

How to use

The screenshot shows the Joomla! administrator interface. The top navigation bar includes links for System, Users, Menus, Content, Components (highlighted), Extensions, and Help. The left sidebar contains a 'Control Panel' section with links for CONTENT (New Article, Articles, Categories, Media), STRUCTURE (Menu(s), Modules), USERS (Users), CONFIGURATION (Global, Templates, Language(s)), EXTENSIONS (Install Extensions), and MAINTENANCE (Joomla is up to date, All extensions are up to date). The main content area displays a dropdown menu for 'Components' with options: Banners, Contacts, Joomla! Update, Messaging, News Feeds, Post-installation Messages, Redirects, Search, Smart Search, and Tags. Below the menu, there are three sections: 'LOGGED-IN USERS' showing 'Super User Administration' at 2017-02-08 19:13; 'POPULAR ARTICLES' showing 'Creating Your Site' (175 views), 'About Us' (10 views), and 'Article 1 Title' (0 views); and a 'MESSAGES' section showing 'About Us', 'Article 1 Title', and 'Creating Your Site' all sent by 'Super User' on 2011-01-01 02:00. The bottom status bar shows 'View Site', '0 Visitors', '1 Administrator', '0 Messages', and a 'Log out' link. The footer indicates 'Joomla! 3.6.5 — © 2017 Joomla Site'.
